Learning Objectives

You’ll be able to:

**Identify** proper installation methods when using engineered lumber products.

**Get** tips on properly specifying products, including engineered lumber floor systems.

**Learn** how to size I-Joists and structural beams.

**Acquire** skills needed to apply various framing details and connections used in the engineered lumber products industry.

**Understand** how software can handle problems that arise from improper installation, so you can determine if repair is needed.
Faculty

Scott Lyons  Boise Cascade
Mr. Lyons has 15 years’ experience in the building materials industry, including, roofing, insulation, granite, dimensional lumber and engineered wood products. He is currently the multi-family/light commercial manager responsible for educating and driving specification for Boise Cascade engineered wood products within that segment.

Stephen Hausner  Boise Cascade
Mr. Hausner started his engineered wood career designing floor systems, and since creating engineered wood products in 1995. Since then, he has worked in many roles including design manager, high-density housing specialist, strategic sales representative, and territory manager, and he is currently the area manager for East Texas including Houston and Louisiana. Mr. Hausner’s primary focus is to create demand for Boise EWP through product education, consulting with builders on maximizing design efficiency and duplicating his efforts through customer training.

Dennis Bott  Boise Cascade
Mr. Bott has been working within the engineered wood industry for over 25 years holding many positions including design manager to manufacturing technical sales. He is currently the business development and project manager responsible for educating and driving specification for Boise Cascade Engineered Wood Products within the Multi-family/Light Commercial segment. In addition to these responsibilities, he also manages the AIA educational program for Boise Cascade.
