Learning Objectives

You’ll be able to:

- **Recognize** the implications of changes within the 2018 International Building Code.
- **Identify** how changes to the IBC will affect a building’s allowable area, height and number of stories based on type of construction, occupancy classification, location on the site and sprinkler provisions.
- **Examine** when to use and how to design fire walls, fire barriers, fire partitions, smoke barriers and smoke partitions.
- **Review** changes to the means of egress requirements, including occupant load, number/width of exits and travel distances.
- **Discuss** ways to incorporate changes in the requirements of the code into future building designs.

Jerry R. Tepe, FAIA  Owner at JRT-AIA Architect, in Hopkinton, New Hampshire

Mr. Tepe is a licensed architect. In practice for more than 40 years, he has been both a member and an officer of large E/A firms and a sole practitioner. His project experience ranges from single-family dwellings to large, multi-million dollar commercial and industrial facilities. As a sole proprietor, his firm specializes in building, fire and accessibility code (ADA) consulting to architects, contractors, insurance and legal professionals and private entities, including third-party plan reviews and accessibility inspections.

Mr. Tepe has been active in the code development process through the AIA since joining the AIA Codes and Standards Committee in 1987. With the creation of the International Code Council (ICC), he participated in the initial development of the International Building Code on the General/Occupancies Subcommittee and was the chair of that group for two terms. Mr. Tepe was a member of the International Fire Code Development Committee for two terms and also the ICC Safety and Egress Code Development Committees. Additionally he served a term on the ICC Code-Correlation Committee. He has made numerous presentations to conference audiences on topics related to building code enforcement and interpretation issues.

Mr. Tepe has held all offices at both the state level (AIANH) and the regional level (AIA New England). He was active in the legislative process in New Hampshire to adopt the first statewide set of building codes. He has taught numerous code and accessibility-related issues in New Hampshire, New England and at BOCA, ICC, BSA and AIA conferences. Mr. Tepe is a past chair of the Building Code Board of Appeals in Concord, New Hampshire. He has also served on several other code and building-related state and local committees and groups, and he is a past chair of the AIA Center for Building Science and Performance Knowledge Community.

Here's what past attendees had to say about the program and presenter Jerry Tepe:

“Tremendous presentation. I learned a lot!”  — Architect

“Good explanations and examples.”  — Fire Protection Contractor

“Mr. Tepe is extremely knowledgeable on the subject and very well spoken.”  — Structural Engineer

### Continuing Education Credit Information

This seminar is open to the public and offers 6.5 continuing education hours to professional engineers and 6.5 HSW continuing education hours to architects in most states.
