Learning Objectives

You’ll be able to:

- Define the purposes of and methodologies for cost estimates, including the need to have cost estimates to accurately plan project budgets and allocate sufficient resources to project phases, and the need to protect the owner and contractors from unanticipated costs which could prevent the project from being completed as planned.

- Estimate labor and equipment costs on projects, enabling the project manager to allocate adequate manpower and equipment to the project to keep it on schedule, and allowing the owner to take possession of the building on schedule and on budget.

- Review subcontractor and vendor cost estimates and quotes, protecting the project by ensuring the accuracy of subcontracted estimates and ensuring the quality of materials and construction processes.

- Participate in group estimating exercises, working as a team to identify all the costs associated in a construction project and to identify appropriate materials, construction processes and costs necessary to meet quality standards, time constraints and the budget limitations.
Faculty

Daniel Frondorf, CPE, CDT
DG Frondorf and Associates LLC, Cincinnati

Mr. Frondorf owns and operates Cincinnati-based DG Frondorf and Associates LLC, a construction cost estimating consulting firm. Dan is a member of Consulting Estimators Round Table (CERT), AACE, and the American Society of Professional Estimators (ASPE).
