Complying with Fire and Building Codes

Atlanta, GA - Friday, November 15, 2019

You’ll be able to:

Identify life safety and building codes which contain fire protection and fire resistance requirements, including the International Fire Code and National Fire Protection Association (NFPA) codes.

Define building occupancy classifications and identify how changes of use and occupancy affect fire protection requirements.

Comply with requirements for fire protection features and equipment, including fire-resistant building materials, fire and smoke protection features, fire detection and alarm systems and sprinkler systems.

Describe fire and building code requirements for exit access and discharge for different types of building occupancies.

Comply with requirements for both number of exits and exit arrangement.
